

IBM Concert Parts & Pricing

1H 2026

Intro

Sell a single IBM Concert platform as a single part

June 12th GA: Self-hosted/on-prem only

(Coming soon) July 7th: SaaS GA

More enablement ahead of July 7th release

On-Prem Pricing

Parts and Pricing

Software License –
PID 5900BBE

Part Description	Part Number	List Price
IBM Concert Software Enterprise Resource Unit License + SW Subscription & Support	D0MK4ZX	\$6,360.00
IBM Concert Software Enterprise Resource Unit Annual SW Subscription & Support Renewal	E0MK2ZX	\$1270.00
IBM Concert Software Enterprise Resource Unit SW Subscription & Support Reinstatement	D0MK6ZX	\$3,820.00
IBM Concert Software Enterprise Resource Unit Monthly License	D0MK5ZX	\$265.00
IBM Concert Software Enterprise Resource Unit Subscription License	D0MK3ZX	\$212.00
IBM Concert Software Enterprise Resource Unit Extended Support 12 Months	X0MK2ZX	\$254.00
IBM Concert Software Enterprise Resource Unit Extended Support Subscription License	X0MK3ZX	\$42.40
<i>IBM Concert Software Enterprise Resource Unit Advanced Support 12 Months*</i>	Z0MK2ZX	\$382.00
<i>IBM Concert Software Enterprise Resource Unit Advanced Support Subscription License*</i>	Z0MK3ZX	\$31.80

Concert Standard RU Model – Ratio Table for On-Prem licenses

Customer's buy the RUs they require to cover the use cases they need.

Use Case	Capabilities	Description	Mapping to Concert RUs
Protect	Vulnerability Management	Capability to detection application vulnerabilities for customers to address	3 RU = 1 application using the vulnerability management capabilities
	Certificate Health	Manage and Rotate Security/Identity Certificates, typically numbers in the thousands	1 RU = 10 certificates under management
	Compliance Management	Capability for automating application compliance against standard or custom frameworks	3 RU per Framework + 2 RU per application the framework was applied to
	Secure Coder (Add-On)	Security plug-in for IDEs that provide scanning and remediation guidance in code for vulnerabilities, exposures and secrets	1 RU per App in addition to vulnerability management (BYO AI) (includes Value Radar)
Resilience	Resilience Posture Assessment	Capability that provides a resilience posture for an application	5 RU = 1 application leveraging the posture assessment
Workflows	Concert Workflows	Capability for automating series of events, used to automate remediations for vulnerability or security gaps	5 RU = 1 deployed workflow in production
Observe	Essentials App Performance Mgmt	Application observability powered by Instana Essentials	1 RU = 7 managed virtual servers
	Standard App Performance Mgmt	Application observability powered by Instana Standard	1 RU = 2 managed virtual servers
Optimize	Optimization	Performance & Cost optimization powered by Turbonomic	1 RU = 5 managed virtual servers

We will update the Concert sales configurator in the coming days.

Software Sizing Examples

New customer who is interested in the platform

- **Step 1:** Find the customer pain point and map to use case (for this example we assume it's Protect: Vulnerability Management and Observe: Instana Standard).
- **Step 2:** Work the customer to find the quantities needed (20 Applications of Vulnerability Management and 150 MVS for Instana Standard).
- **Step 3:** Map the quantities to Resource Units based on the table (see previous slide). Note: for GA this step can be completed in the Sales Configurator. For our example it is: $(20 \times 3) + (150 / 2) = 60 + 75 = 135$ RUs
- **Final Step:** Decide on license type (Perpetual or SL, see next slide).

Software Sizing Updates

Existing customer who is interested in the platform

- **Existing Concert Customer:** Good news! As the Concert product has evolved to the platform they are already entitled.
 - If they are interested in additional use cases, we can **sell more** RUs based on the example for new customers.
- **Existing Turbo or Instana Customers:** Trade ups are available based on the approved many-to-one trade up model. Trade quantities will be based on the approved RU table (see earlier slide).
 - Option 1 Perpetual to Perpetual Trade Up: S&S SRP + 95% with BOM - License 41%, S&S 59%
 - Option 2 Perpetual to Subscription License Upgrade: S&S SRP + 35%
 - If they are interested in additional use cases, we can sell more RUs based on the example for new customers.
