

IBM Turbonomic Pricing and Sizing Guide - 2026

IBM Turbonomic ARM Pricing Model

MVS Metric: Counting Physical Nodes, VMs, Instances, K8s / RHOCP Nodes

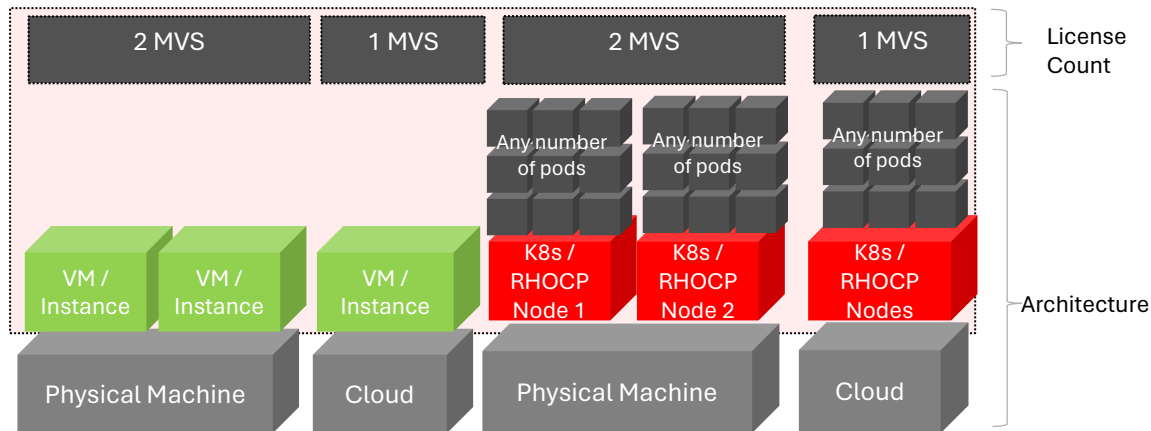

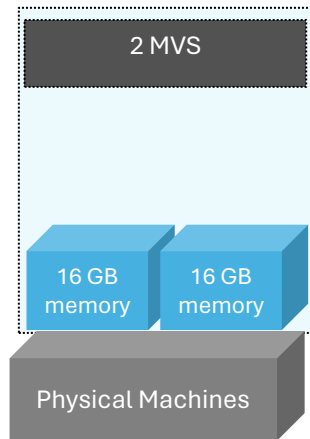

1 VM, 1 Instance or 1 Kubernetes / Red Hat OCP Node

3 Rules of MVS

- ✓ Customers count physical machines only when they are not virtualized
- ✓ Customers count VMs when the physical machines are virtualized
- ✓ Customers count all nodes in Kubernetes / Red Hat OCP environments

IBM Turbonomic

ARM license 1 * MVS

Managed Virtual Server official metric definition

Managed Virtual Server is a unit of measure by which the Program can be licensed. A server is a physical computer that is comprised of processing units, memory, and input/output capabilities and that executes requested procedures, commands, or applications for one or more users or client devices. Where racks, blade enclosures, or other similar equipment is being employed, each separable physical device (for example, a blade or a rack-mounted device) that has the required components is considered itself a separate server. A virtual server is either a virtual computer created by partitioning the resources available to a physical server or an unpartitioned physical server or a Cloud Instance with the same set of resources. Licensee must obtain Managed Virtual Server entitlements for each virtual server managed by the Program.

Right-Sizing Questions to Ask Your Customer

How many Virtual Machines (VM) are you managing?

How many cloud instances (Cloud VMs) are you managing?

How many nodes do you have in your container environment?

How much are you spending on your cloud environment?

IBM Turbonomic ARM Modeling and Sizing Examples

<u>Scenario # 1</u> On-Premises	 10,000 VMs	MVS = 10,000
<u>Scenario # 2</u> Cloud	 5,000 Cloud Instances	MVS = 5,000
<u>Scenario # 3</u> Multicloud	  10,000 VMs  500 Nodes	$\text{MVS} = 3,000 + 10,000 + 500$ $\text{MVS} = 13,500$

Currently Available IBM Turbonomic Product IDs

IBM Turbonomic Product IDs (PIDs)

- IBM Turbonomic are currently available under IBM PPA terms and conditions
 - IBM Turbonomic (5900-AP1)
 - Standard SaaS, managed virtual servers
 - Standard SaaS, monitored costs (aka, % cloud spend)
 - For Government Standard SaaS, managed virtual servers
 - IBM Turbonomic Parking Edition, managed virtual servers
 - IBM Turbonomic On-Prem (5737-N29)
 - Subscription, managed virtual servers
 - Perpetual, managed virtual server (restricted)
 - IBM Turbonomic Hosting (5900-B74) *
 - Subscription, instance

* Eligible for catalog inclusion with WW Approval, except for Turbonomic Hosting which is not eligible.

IBM Turbonomic Parking Edition – SaaS Pay per Use

PID	Part Number	License	Product Description	Price
5900-AP1	D177KZX	Subscription	IBM Turbonomic Parking Edition Managed Virtual Server per Month Pay per Use	\$6.26

- No MOQ set, paygo parts can be used with 1 MVS or more.
- Customers pay monthly for the number of MVS they provision.

IBM Turbonomic For Government Standard SaaS, Managed Virtual Server (MVS)

PID	Part Number	License	Product Description	Price
5900-AP1	D11Q7ZX	Subscription	IBM Turbonomic For Government Standard Managed Virtual Server per Month	\$23.50
5900-AP1	D11Q8ZX	Overage	IBM Turbonomic For Government Standard Managed Virtual Server Overage	\$28.20
5900-AP1	D14IUZX	SLA	IBM Turbonomic SVC Level Agreement	\$0.00
5900-AP1	E126EZX	In-Country Support	IBM Turbonomic For Government Standard Managed Virtual Server US In-Co Spt per Month	\$9.40
5900-AP1	E11Q9ZX	Advanced Support	IBM Turbonomic For Government Standard Managed Virtual Server Advanced Support per Month	\$3.53
Minimum Quantity Range			Maximum Discount	
000 – 199			0% discount allowed	
200 – 499			25%	
500– 999			35% - Requires approval of WW Sales Leader	
1000 +			45% - Requires approval of WW Sales Leader	

IBM Turbonomic Standard (SaaS) Monitored Costs

PID	Part Number	License	Product Description	Price
5900-AP1	D0I0GZX	Subscription	IBM Turbonomic Standard Monitored Costs per Annum License	Tiered Pricing
5900-AP1	D0I0HZX	Overage	IBM Turbonomic Standard Monitored Costs per Annum Overage	Tiered Pricing
5900-AP1	D09EEZX	SLA	IBM Turbonomic SVC Level Agreement	\$00.00

- Minimum quantity order is 16 units, (i.e., at least \$1,500,001 to \$1,600,000 USD of annual cloud spend).

IBM Turbonomic Standard (SaaS) Monitored Costs

Tiered Pricing

Cloud Spend (USD)	Monitored Cost Units 1 unit = \$100K	Monthly Price	Annual Price
1,600,000 to 2,500,000	1 to 25	\$250.00	\$3,000.00
2,500,001 to 5,000,000	26 to 50	\$213.00	\$2,556.00
5,000,001 to 7,500,000	51 to 75	\$184.00	\$2,208.00
7,500,001 to 10,000,000	76 to 100	\$159.00	\$1,908.00
10,000,001 to 15,000,000	101 to 150	\$134.00	\$1,608.00
15,000,001 to 20,000,000	151 to 200	\$113.00	\$1,356.00
20,000,001 to 25,000,000	201 to 250	\$107.00	\$1,284.00
25,000,001 to 30,000,000	251 to 300	\$100.00	\$1,200.00
30,000,001 to 40,000,000	301 to 400	\$91.70	\$1,100.40
40,000,001 to 50,000,000	401 to 500	\$84.20	\$1,010.40
50,000,001 to 75,000,000	501 to 750	\$81.70	\$980.40
75,000,001 to 100,000,000	751 to 1000	\$79.20	\$950.40
100,000,001 to 150,000,000	1001 to 1500	\$75.00	\$900.00
150,000,001 to 200,000,000	1501 to 2000	\$73.40	\$880.80
200,000,001 or more	2001 or more	\$70.90	\$850.80

IBM Turbonomic (SaaS) Managed Virtual Server (MVS)

PID	Part Number	License	Product Description	Price
5900-AP1	D09ECZX	Subscription	IBM Turbonomic per Managed Virtual Server Committed Term License	\$18.80/mo
5900-AP1	D09EDZX	Overage	IBM Turbonomic per Managed Virtual Server Overage	\$22.60
5900-AP1	D09EEZX	SLA	IBM Turbonomic SVC Level Agreement	\$00.00

Minimum Quantity Range	Maximum Discount
50 – 199	0% discount allowed
200 – 499	30%
500– 999	40% - Requires approval of WW Sales Leader
1000 +	50% - Requires approval of WW Sales Leader

**Discount includes Channel margin

IBM Turbonomic Hosting (SaaS) Instance

PID	Part Number	License	Product Description	Price
5900-B74	D0HE7ZX	Subscription	IBM Turbonomic Hosting per Instance License (12 months)	\$53,040/year
5900-B74	D0HE8ZX	SLA	IBM Turbonomic Hosting per Instance License (12 months)	\$00.00/year

- These parts can only be sold to existing Turbonomic On-Prem customers who want to move to Turbonomic SaaS.
- Existing customers can buy 1 and only 1 instance and cannot renew with another Hosting instance.
- No discounts are allowed on this offering.
- A customer cannot purchase Turbonomic On-Prem at the same time of purchasing Turbo Hosting.
- Turbo Hosting cannot be sold for less than a 3-month term.
- A customer can purchase the Turbo SaaS parts with Turbo Hosting to be able to expand their entitlement in SaaS when their current entitlement is insufficient to cover their target environments.

IBM Turbonomic On Prem Managed Virtual Server (MVS)

PID	Part Number	License	Product Description	Price
5737-N29	D28FALL	Subscription	IBM Turbonomic On Prem per Managed Virtual Server Subscription License	\$21.15/mo
5737-N29	D28F7LL	Perpetual	IBM Turbonomic On Prem per Managed Virtual Server License + Software Subscription & Support 12 MO (Restricted)	\$1,270.00/yr
5737-N29	D28F8LL	Reinstatement	IBM Turbonomic On Prem per Managed Virtual Server Software Subscription & Support Reinstatement 12 MO	\$763.00/year
5737-N29	E0R28LL	Renewal	IBM Turbonomic On Prem per Managed Virtual Server Annual Software Subscription & Support Renewal	\$254.00/year
5737-N29	D28F9LL	Monthly	IBM Turbonomic On Prem per Managed Virtual Server Monthly License	\$56.90/mo

IBM Turbonomic for Linux on Z (MVS)

PID	Part Number	License	Product Description	Price
5737-N29	D0A65ZX	Subscription	IBM Turbonomic for Linux on Z per Managed Virtual Server Subscription License	\$21.15/mo
5737-N29	D0A63ZX	Perpetual	IBM Turbonomic for Linux on Z per Managed Virtual Server License + Software Subscription & Support 12 MO (Restricted)	\$1,270.00/yr
5737-N29	D0A66ZX	Reinstatement	IBM Turbonomic for Linux on Z per Managed Virtual Server Software Subscription & Support Reinstatement 12 MO	\$763.00/year
5737-N29	E0A62ZX	Renewal	IBM Turbonomic for Linux on Z per Managed Virtual Server Annual Software Subscription & Support Renewal	\$254.00/year
5737-N29	D0A64ZX	Monthly	IBM Turbonomic for Linux on Z per Managed Virtual Server Monthly License	\$56.90/mo

- * These parts only supports “Managed To” use case for Linux on Z systems. The product is the same On Prem code and must be installed on a distributed system. Afterwards, it can be configured to manage containerized workloads that are running in OpenShift for Linux on Z.
- * L0 approval is required to sell Turbo for Linux on Z - please refer to the FAQ slide for the approval requirements.

Engaging the
Turbonomic team

How to request deal assistance from Turbonomic

1

Upon identifying an IBM Turbonomic ARM opportunity, create the opportunity in IBM Sales Cloud (ISC).

2

Email the correct region:

- TurbonomicAmericas-DealAssist@IBM.com
- TurbonomicEMEA-DealAssist@IBM.com
- TurbonomicAPAC-DealAssist@IBM.com
- TurbonomicJapan-DealAssist@IBM.com

Include the following Information:

- Company name
- Contact's name and email
- Pain point
- Industry
- Segment (S1 or S2)
- Product interest - ARM
- Your email
- Your ISC #
- Turbonomic seller's name (If known)
- Deal assistance required

3

The Turbonomic SMEs will review and confirm they are able to provide the assistance requested and contact you to initiate collaboration.

4

Jointly pursue the deal with your Turbonomic SME colleagues.

Complete you quote in SQO and finalize contract negotiations to close the deal on IBM paper.

5

When your deal is closed/won, your compensation will flow through IBM's BAU processes.

FAQ

- **What needs to be proven for L0 approval of Turbonomic for Linux on Z?**

- Please verify that the customer knows and understands that this software part must be installed to a Linux X86 machine and only supports managing containerized workloads running in Red Hat OpenShift for Linux on Z.
- The customer also needs to know and understand that this software cannot be installed directly to zOS or zSystems and cannot manage zSystem resources themselves.
- Please provide evidence that the customer knows Turbonomic ARM for Linux on Z only supports the "Manage TO" scenario and does not support the "Manage FROM" scenario.

- **When will overages be billed for Turbonomic SaaS customers?**

- Although overage parts are required for each Turbo SaaS sale, we are not currently billing for customer use above their entitlement. Overage billing onboarding for SAPcc has been put on hold indefinitely.

- **Can I sell a subscription for longer than 36 months? Yes, however:**

- Client must be on the latest supported version of the software throughout the term;
- IBM reserves the right to update or change the lifecycle policy throughout the term and may require an upgrade or trade-up to another program at additional cost;
- If client requires support for a specific version declared EOS or EOL then the client may be required to purchase Extended or Sustained support, if available.

- **Should I sell Perpetual or Subscription Turbonomic On-Prem?**

- We have the Perpetual part restricted as we rarely allow the sale of this part for non-Federal customers. Please position the Subscription part for sales and only offer Perpetual if there is pushback.

- **How do we rightsize OCP environments?**

- For OCP Virtualization - pricing is based on the VM counts
- In OCP - pricing is based on the Node counts
- For the mixed environment i.e where one has both OCP for containers and also hosting VMs on same OCP cluster we charge either VMs or Nodes.
