IBM webMethods Hybrid Integration
Subscription

1

IBM webMethods Hybrid Integration SaaS components

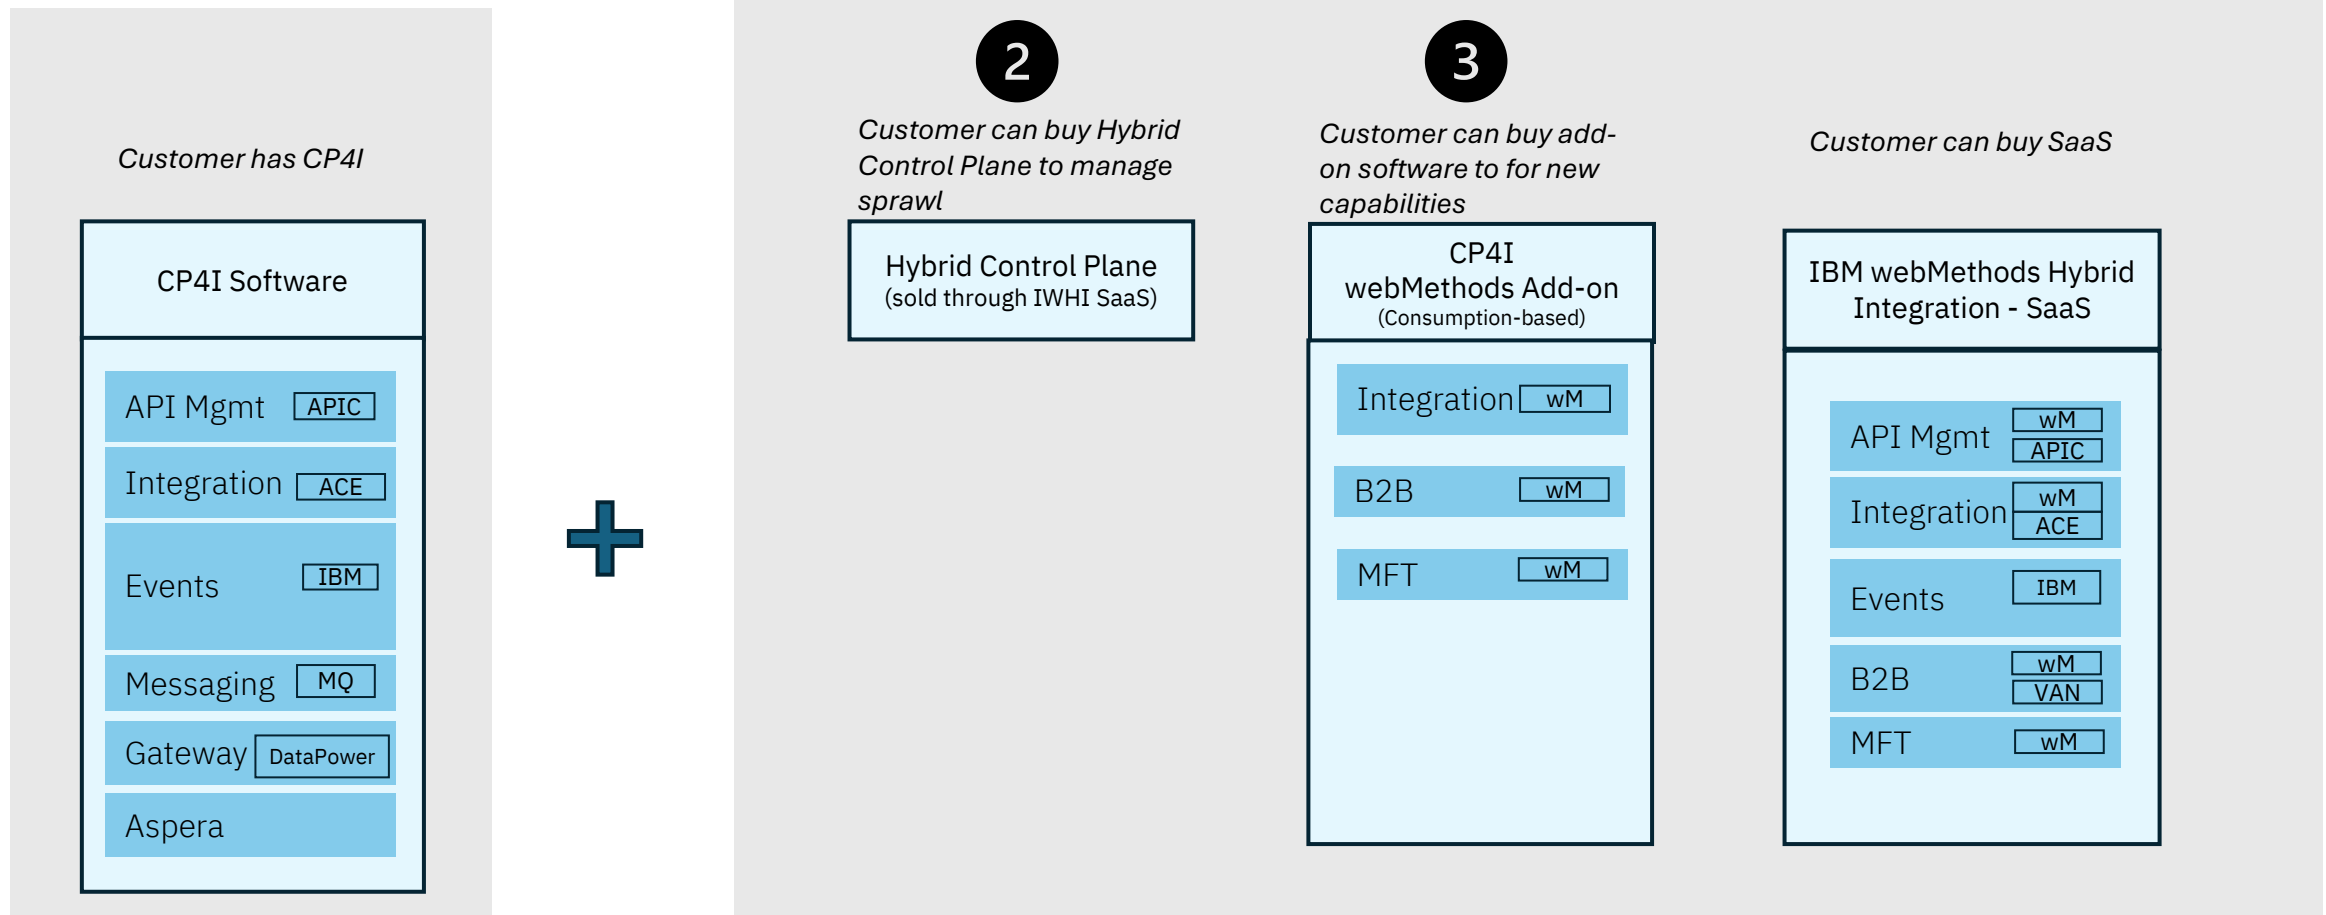

Brings together IBM and webMethods components

Path for CP4I Customers

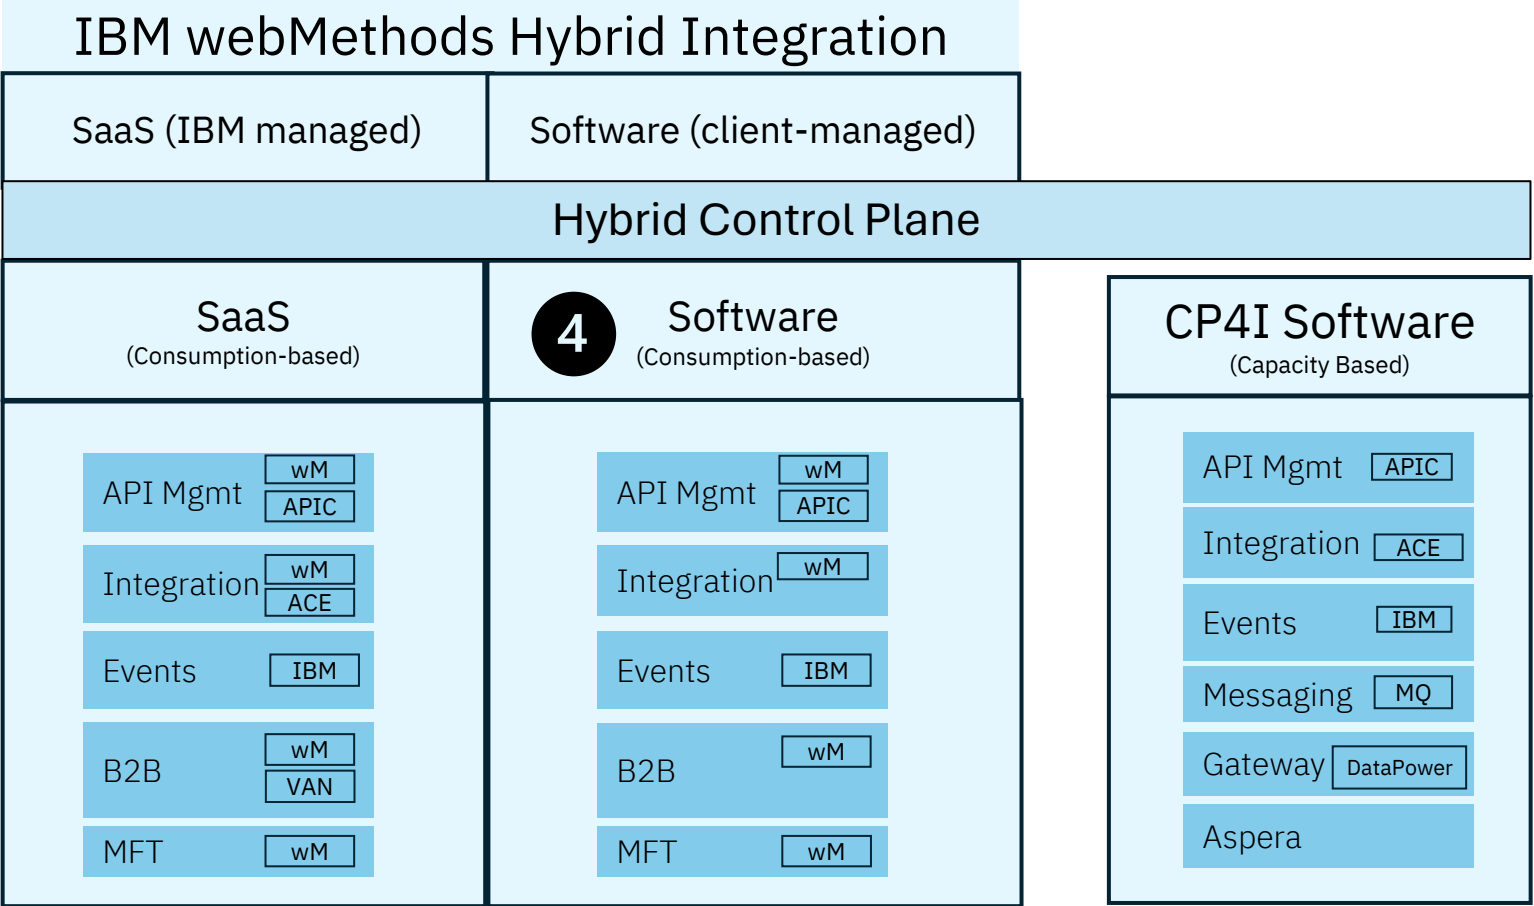

(Protect CP4I and add value where appropriate to modernize)

CP4I customer can acquire any combination of the three capabilities below based on their modernization needs, without disruption to their existing CP4I deployment

Note: Z parallel part will be available for CP4I webMethods add-on

IBM webMethods Hybrid Integration is available as SaaS and Software to support hybrid deployment

Note: Z parallel part will be available for Pembroke Software to simplify inclusion in z ELAs

Positioning Motions

Customer Type	What to Position?	Why?
New Customer	- IBM webMethods Hybrid Integration - SaaS - IBM webMethods Hybrid Integration - Software	Lead with hybrid iPaaS and differentiate in the market
webMethods Customer	- IBM webMethods Hybrid Integration - SaaS - IBM webMethods Hybrid Integration - Software - Hybrid control plane	Modernize with AI and new experience New capabilities EA, B2B VAN, additional APIM capabilities
CP4I Customer and/or Mainframe Customer	- IBM webMethods Hybrid Integration - SaaS - webMethods add-on for CP4I - Hybrid control plane - Expand CP4I deployment (App Connect for scenarios centered around Z Mainframe)	Maintain current investment in CP4I and modernize with new capabilities. CP4I is the strategic platform for containerized self-managed deployments. ACE / IIB runs natively on Z.
Existing Sterling Customer	- IBM webMethods Hybrid Integration - SaaS - IBM webMethods Hybrid Integration - Software	Position API Management and App Integration capabilities of IBM wM Hybrid Integration to modernize MFT SaaS as new capability
